Higher education institutions and the Ministry of Higher Education, Research and Innovation set the standard requirements or criteria for each scholarship programe. You should carefully read these requirements before applying for a specific programe and ensure that you met or are likely to meet the standard requirements for that programe.

You should rank your programes in order of personal preference. The HEAC system has been designed to competitively shortlist applicants for one of their preferred programes.

You are advised to apply for the maximum number of preferred programes for which you are deemed eligible, and not just limit your options to scholarship programes with higher or competitive requirements as this would also limit your chances of being competitively selected for a seat offer by HEAC electronic system.
